

A person I would like to thank in my primary school

I have studied at C.C.C. Kei Faat Primary School for four years. This is the fifth year I am studying. Of course, I will thank all the teachers and classmates because most of them have been nice to me. However, if you ask who I most would like to thank in my primary school life, I would like to thank my best friend, Amilie.

I have been in the same class as her in primary 1, 2, 4, 5. However, I did not be in the same class in Primary 3, but she still plays with me and talks to me. I also help with her Math homework because I am dead good at that.

Once my average mark at P. 3 first term was 92.25. I had got down to second place and lost my first place throne. I was so down in the dumps because I used to get first place. Then I heard so much bad news. When she knew I had so many bad experiences, she said, Stop the doom and gloom. I know you are unhappy. Why don't you go to play basketball with me to blow away the cobwebs? Not gonna lie. I felt much better when she said it.

We became friends when we were at P.3. I always invite her to the park to play with a lot of other friends and me. We still play with each other. I have had lots of fun with her. I like playing with her. If she played with others and didn't play with me, I would get FOMO.

She also worked on a project with Emily, Jesse, Caroline, and me. We all worked hard, and we worked all week! Although we didn't win, at last, she taught me lots of knowledge.

After getting along for many years, I learnt I should be nice to and help each other. I had learnt lots of things from her. So, I really want to say "thank you" to her.
